RX Architects

Project

Nyetimber Vineyard - Pulborough

Duration

5 Weeks

Nyetimber based in Pulborough is an exclusive vineyard producing fine wines and Champagne. RX Architects were appointed to redevelop the existing medieval barn which dates back to the Domesday Book in 1086. RX contacted ALD to supply a design concept to light the open space which was being used for receptions and wine tasting.

Through the design process RX Architects decided they liked the idea of a stand alone solution with all the control gear enclosed within the base. Using two different beam angled reflectors within the custom units, we achieved uniform illumination to the roof void and floor.

ALD added a Helvar DALI system allowing grouping and scene setting for events.
