

Customer

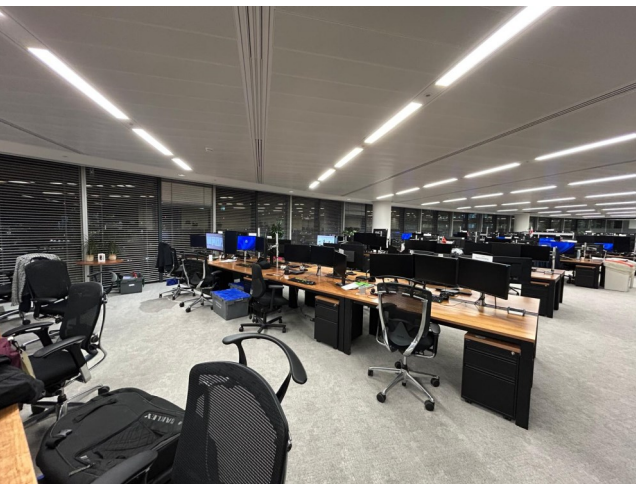

GCL Building Technologies

Project

Moor Hse, 120 London Wall

Duration

12 Weeks

GCL were asked to design a CAT A fit out for the Electrical, Lighting & Data on the 10th, 12th, 13th floors, each floor having complete new lighting system using our Delta SAS 130 trough mounted in linear runs throughout the floors, Capri 192 downlighters were Introduced to the solid perimeter ceiling of the office, within the meeting and board-rooms suspended Lustre was installed along with Defo in the lift lobby coffers

Within our design we had to incorporate lighting controls, DALI 2 drivers were used in all the products allowing Symtronic to pair with there marshalling control boxes allowing daylight dimming and scene control to be introduced.

Products:

Delta SAS 130, Capri 192, Lustre, Defo
